## FOREWORD

These views are all copies of original kodak views taken in the Davidson District by some member of Remick, Lloyd & Co.

Remick, Lloyd & Co. have farmed on a large scale themselves and sold farm lands in the Davidson District now since 1903. One of the members of the Company makes his home at Davidson the entire year.

We have for sale the choicest lands of the district in tracts ranging from 80 acres up to several sections, some improved, partly improved, and raw prairie. Prices still cheap and on easy terms.

Write our Chicago office for full information, maps, copies of settlers' letters, prices, terms, railway excursion rates, etc.

Hunting Is Still to Be Had in This Same Region.

## DAVIDSON DISTRICT

SASKATCHEWAN, CANADA

Wheat yields 25 to 40 bu. per acre, oats 60 to 100 bu. per acre, barley 40 to 60 bu. per acre, flax 15 to 30 bu. per acre on these lands in the Davidson District.

Timothy, clover, alfalfa, in fact all grasses grow in abundance. All kinds of garden produce and many of the small fruits do exceptionally well.

There is no better location in America for a grain farmer, a mixed farmer or a stock farmer.

Markets are good and close, taxes are low, roads are good, water and climate good, the district has rural telephones, good schools and churches and the best class of settlers.

This district is 15 years old, not a new experiment. The settlers there have made good out of the Davidson land.

## YOU

can own one of these farms. They can be bought with a small cash payment down and the balance in serial annual payments at 6% interest.

The majority of the farmers owning farms such as shown in this album started in the Davidson District only a few years ago on very small capital. The farms pay for themselves.

Take a trip to Davidson with us on a cheap excursion ticket. Talk to the settlers, see the farms yourself. We guarantee you will be more than convinced. This land is cheap, terms easy, interest low. These opportunities have to be seized while they exist. They won't last long.

Write or see us,
